

AI HORIZON SOLUTION CHALLENGE 2026

The AI Horizon Solution Challenge 2026 is an innovation competition where participants solve a real industry problem using technology-based solutions. Teams will first submit a Project Proposal and Project Video. Shortlisted finalists will then present and demonstrate a functional project at AI Horizon 2026.

1. Submission Requirements

Prelim: Prototype Demonstration Video (Required Submission)

Teams are required to submit a **6–10 minute Prototype Demonstration Video** showcasing their proposed solution and functional prototype.

The video should clearly demonstrate the following:

- 1. Problem Statement and Objectives**
 - The industry problem or challenge being addressed
 - The objectives and expected outcomes of the proposed solution
- 2. Proposed Solution**
 - Overview of the solution developed
 - Innovation and uniqueness of the approach
 - Target users or industry applications
- 3. Technical Approach and Design**
 - Development methodology and technologies used
 - System design, architecture, and key components
 - Hardware and/or software implementation (where applicable)
- 4. Functional Prototype Demonstration**
 - Live demonstration of the prototype in operation
 - Key features and functionalities
 - User interaction and practical application
- 5. Testing and Validation**
 - Testing process and evaluation methods
 - Results and improvements achieved
- 6. Industry Value and Future Potential**
 - Benefits and impact to the industry
 - Scalability and future enhancement opportunities
 - Potential for adoption or commercialisation

The video must be submitted via a **YouTube link**. Teams are responsible for ensuring that the submitted link remains accessible to the Organiser and judging panel throughout the evaluation period.

An inaccessible or unavailable video link may result in the submission being considered incomplete.

Final Presentation & Live Demonstration (Finalists Only)

Following the evaluation of all Pre-lim submissions, teams with the highest evaluation scores will be shortlisted as finalists.

The list of finalists will be announced on **28 September 2026** through the official AI Horizon Solution Challenge communication channels.

Shortlisted teams are required to attend the Final Stage at **AI Horizon 2026** on **7 October 2026**.

During the Final Stage, each finalist team shall:

- A. Present their proposed solution.
- B. Demonstrate a functional prototype through a live demonstration.
- C. Participate in a Question and Answer (Q&A) session with the judging panel.

The live demonstration must clearly demonstrate the functionality and performance of the proposed solution. Static mock-ups, presentation slides, posters, concept drawings, or pre-recorded videos shall **not** be accepted as a substitute for a live functional prototype demonstration.

2. Industry Challenge Statements

1. Participants are required to select **one (1)** of the following official Industry Challenge Statements.
2. Participants are encouraged to review the selected challenge carefully before preparing their submission.
3. The official Challenge Statements should be referred to throughout the development of the proposed solution.

Challenge 1 - Exabytes

Title: AI SME Digital Growth Advisor

Link :  **Exabytes Malaysia.pdf**

Challenge 2 - NSW Automation

Title: AI Dispensing Defect Detective

Link :  **NSW Automation .pdf**

2. General Rules

a. Eligibility.

1. The competition is open to students currently enrolled in eligible tertiary education institutions.
2. Participants may compete individually or as a team of up to **three (3) members**.
3. Each participant may participate in one (1) team only and may not be registered as a member of multiple teams.

b. Solution and Prototype Requirements

1. Teams may develop any appropriate technology-based solution, including software, hardware, AI, automation, IoT, robotics, data analytics, or an integrated solution.
2. No specific technology, programming language, platform, AI model, or hardware is compulsory unless otherwise stated by the Organiser.
3. A functional prototype is compulsory for the Final Stage and must demonstrate the core function of the solution.
4. Static mock-ups, presentation slides, posters, concept drawings, or pre-recorded videos alone will not be accepted as a functional prototype.

c. Originality and Third-Party Technologies

1. All submissions must be the original work of the participating team.
2. Open-source libraries, APIs, datasets, pre-trained AI models, frameworks, and hardware modules may be used, but must be clearly declared.
3. Teams must clearly distinguish their own work from third-party technologies or resources.
4. Plagiarism, falsified results, misleading claims, or misrepresentation of third-party work may result in disqualification.

d. Submission and Testing

1. All required submissions must be completed and submitted through the designated submission channel before the deadline.
2. Late or incomplete submissions may not be evaluated.
3. Teams must provide genuine evidence that the prototype has been tested and must be able to explain the results and limitations of the solution.

e. Final Presentation and Judging

1. Shortlisted teams must attend the Final Stage and present their solution to the judging panel.
2. Teams must demonstrate the core function of the prototype live and answer questions from the judges.
3. The decisions of the judging panel are final.

f. Safety, Ethics and Intellectual Property

1. Teams are responsible for ensuring that their solution is safe and complies with applicable ethical, privacy, and legal requirements.
2. **Intellectual Property Rights:** All intellectual property rights, designs, software, hardware, and assets developed for this competition shall belong exclusively to the industry challenge sponsor corresponding to the selected track (**Exabytes** for Challenge 1 or **NSW Automation** for Challenge 2). Participants acknowledge and agree that entry into the challenge constitutes an assignment of such IP rights to the respective company partner.
3. The Organiser reserves the right to stop any demonstration considered unsafe or non-compliant with the competition requirements.

g. Rights of the Organiser

1. The Organiser reserves the right to amend the competition rules, schedule, judging process, or other arrangements where necessary.
2. The Organiser may verify the originality, development process, testing evidence, and technical claims of any submission.
3. The Organiser reserves the right to disqualify any team that fails to comply with the competition rules or provides false or misleading information.
4. By participating, teams grant the Organiser permission to photograph, record, display, and promote their participation and competition entry for event and promotional purposes.

3. Judging Criteria

All submissions will be evaluated by a panel of judges based on the six criteria below, for a total of 100 points.

Criterion	Points
1. Industrial Problem-Solving Value	25%
2. AI Innovation & Technical Implementation	25%
3. Industry Impact & Feasibility	20%
4. User Experience & Solution Design	15%
5. Presentation & Demonstration	15%
Total	100%

4. Prize Money

The winning teams of each track will receive the following cash prizes,

- **CHAMPION TEAM** - RM5000
- **1ST RUNNER UP** - RM1000
- **2ND RUNNER UP** - RM500

5. Register & Submission Link

Registration Link

<https://forms.gle/wF9artJypCWB5PM67>

Submission Link

Will be announce in Whatsapp Group

6. Deadline

Deadline Submission : 21 September 2026 ,11.59 pm

Result Announcement : 28 September 2026

7. Whatsapp Link

For enquiries, competition updates, announcements, and important information, participants are encouraged to join the official AI Horizon Solution Challenge 2026 WhatsApp Group. ,
